-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This is an office action for serial number 10/635686.

Election/Restrictions

Claims 13-16, 28-30, 34, 38-43 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species and invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 14, 2005 and February 16, 2006.

Applicant's election without traverse of species I and Invention I in the reply filed on October 14, 2005 and February 16, 2006 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 9-12, 17, 22-27, 31-33, 36, and 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Jaconette, Jr. (Jaconette) RE 29,752. Jaconette discloses a first opening (50), a second opening (between 62), retaining member (62) including centering tabs (64, in regards to claims 3-5) or

Art Unit: 3632

retaining tabs (in regards to claims 17, 22, 23) being angled, an aperture positioned adjacent to closing tab(54), slit (see figure below).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3-5, 8, 18-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jaconette Re 29,752 in view of Tinnermann 3,523,299. Jaconette discloses all of the

Art Unit: 3632

limitations of the claimed invention except for the centering tabs. Tinnermann teaches that it is known to have retaining tabs including centering tabs (30 and 31) being angled. It would have been obvious to one having ordinary skill in the art at the time of the invention to have modified Jaconette to have included the centering tabs as taught by Tinnermann for the purpose of providing bearing engagement with the root of an adjacent thread and providing greater strength to the fastener.

Claim 35 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jaconette Re 29,752 in view of Lorentzen 3,140,071. Jaconette discloses all of the limitations of the claimed invention except for the depression. Lorentzen teaches that it is known to have a depression (25b and 25c). It would have been obvious to one having ordinary skill in the art to have modified Jaconette to have included the depression as taught by Lorentzen for the purpose of providing a better gripping action on the supporting surface and any member being attached.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

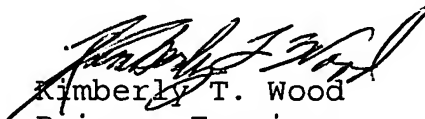

Art Unit: 3632

The prior art discloses conventional mounting brackets.
